Bewegungsfugenprofile Movement joint profiles

Die schwellenlosen Profile werden überall dort eingesetzt, wo dauerelastische Bewegungsfugen notwendig sind. Die patentierten Profillösungen vermeiden Stolperkanten und sorgen damit für mehr Sicherheit.

The threshold-free movement joint profiles can be used anywhere, where long-lasting elastic movement joints are required. The patented profiles avoid tripping hazards and therefore improve safety. The threshold-free movement joints are designed to be installed in places where permanent joint movement is necessary.
